

RAMA KEN

FRONT END DEVELOPER

contact- ramaken260@gmail.com

Daejon South Korea

PERSONAL PROFILE

I am a web developer who has had the chance to be awarded by companies like LG and SAMSUNG. Besides from my knowledge in computer programming I have skills in graphic design software which have enabled me to make better solutions. I have worked with Sinteyang(styp.co.kr) as a web developer and designer. My ability to speak in three languages (English, Korean and Swahili) has enabled me to work well in diverse environments and shape my surroundings using my knowledge.

PROFESSIONAL EXPERIENCE

- GotickAfrica (December 2017 – August 2018)
 - I was a part of the team of an online mall based in Tanzania and worked as a web developer and as a web designer.
 - I undertook front-end development with html, CSS and JavaScript.
 - I did the back-end development in PHP and MySQL.
 - I made wireframes of the designs in Photoshop and illustrator.
 - I integrated payment gateway systems like paypal and pesapal.

- STYP KOREA (December 2016 – August 2017)
 - I worked as a web developer in styp korea which is a patent company located in Daejeon. I took part in many projects making websites. I was involved in the following projects.
 - Made an Intellectual Property Rights Management System which was web based to help clients of our company to register their products easily. I took part in designing the site using adobe illustrator and did the front end development of the site using css and javascript to build the user interface of the system.
 - Made software for a portable server. I was given the duty to make the tools for the website builder which would enable anyone with the stick software to easily make a website from their computer or phone. I used JavaScript technologies and css media queries to make the site responsive.
 - Built a graveyard management system which enables people to make an online profile of their loved ones. The website was based in Vietnam. I used illustrator to design the whole site and later coded it using bootstrap , css and javascript.

- JOCELYNCLARK.COM/PAICHAI.HTML (2016)

- Responsive css coding with css media queries.
- Used skeleton css framework to make a fluid system.
- Designed icons in illustrator.
- Made a poster from the information in the website in illustrator.
- Designed a motion graphic video for the site.
 - Made illustrations in illustrator.
 - Wrote a story line and script for the video.
 - Animated the elements in adobe after effects.

(jocelynclark.com/paichai.html)

- KIMSUNTAE.COM (2015)

- Made up a wireframe of website and mocked it up in illustrator.
- Optimized all the pictures in photoshop before uploading them to the site.
- Used font-awesome css tool-kit to design the social media icons.
- Built a responsive grid system from scratch without any frameworks.
- Coded using media queries.
- Made a photo gallery using j-query library for Javascript.

- Made a lightbox effect on pictures on the phone and added a photo-swipe effect using jquery.
- LG GLOBAL CHALLENGER 2014
 - Built a static website to showcase information about renewable energy in Korea.
 - Edited educational videos about renewable energy in adobe premiere pro and after effects.
 - Took part in the research process and writing the final report.
